As a solar power user I feel it is important to take into consideration all of the benefits that solar offers out state. There are proven health benefits, resource benefits, land use benefits among other things that solar offers. Large corporations are out to protect their shareholders and are not as interested in the well being of the people of this state, the end result should be a logical calculation that is equitably balanced between the Corporations and the Individuals of this state. Also we should be looking at all of the options with a 20 to 25 year horizon, anything less is not realistic.
